Professional Profile

Full-stack developer with strong experience in fintech environments, specializing in the development of mobile and web applications focused on money movement, cryptocurrencies, and secure payment systems. Skilled in working across the stack to ensure security, reliability, and performance in mission-critical financial systems. Experience includes card tokenization, retry queues for payment operations, blockchain transaction handling, and compliance with industry security standards. I am seeking to join a team where I can contribute my technical expertise in financial products and continue to grow professionally.

Work Experience

Wirall (Project: Ligo / Payfi) *Full-stack Developer*

Remote for Perú

January 2025 - Present

Leading the end-to-end development of **Payfi**, a new Fintech product focused on transforming credit card payments into account transfers.

- Responsible for the complete project lifecycle: initial schematization, architectural design, and full-stack development from scratch.
- Implementing robust backend services with NestJS and high-performance frontends with Next.js for the Peruvian market.
- Designed background job queues to handle payment retries, ensuring consistency under intermittent network conditions.
- Applied security and fraud prevention strategies

Vita Wallet — *Frontend Developer*

Remote for Chile

February 2024 - November 2024

Developed and maintained the Web and Mobile Fintech applications using a shared architecture (submodules for UI and Custom Hooks) to ensure cross-platform consistency.

Contributed to both the React Native mobile application and the web platform of this Chilean fintech..

- Led the migration of the mobile stack from React Native 0.66 to 0.76, and upgraded the Node.js runtime from v14 to v22, including all dependencies.
- Integrated card tokenization on iOS using Apple PassKit (Apple Pay) written in objective-c
- Implemented a new mobile onboarding featuring complex animations and transitions, maintaining backward compatibility with the Web version.
- Designed and applied the Strategy Pattern to handle dynamic forms driven by backend responses.
- Optimized the UI with custom reusable components and custom skeleton hoc
- Resolved critical performance and interaction issues related to gesture handler , panresponder.

Kiura — *Fullstack Developer*

Remote for Colombia

May 2023 – January 2025

- Developed new features and maintained existing systems.
- Designed SQL and NoSQL databases.
- Enhanced user experience through the application of UX/UI principles.
- Followed Agile methodologies using Jira and Notion.
- Interacted with clients to understand and analyze business requirements.
- Integrated third-party APIs and external services.

Freelance Developer for Companies and Direct Clients

Remote Argentina

February 2023 – April 2024

- Managed end-to-end application development, from tech stack selection to project structure organization.
- Designed and implemented both SQL and NoSQL databases.
- Focused on user-friendly experiences using modern UX/UI practices.
- Built and maintained reusable frontend components.
- Integrated APIs and payment services.

- Conducted direct communication with clients to align technical development with business goals.
-

Highlighted Projects

Wirall — Contractor

 January 2025 – Present

 [Web App](#)

- Architected and schematized the project from scratch using **Next.js** and **NestJS**.
- Designed a scalable system for the Peruvian market, handling both frontend and backend development.
- Lead Fullstack Developer in the creation of **Payfi**, a fintech solution for converting credit card payments into transfers.

Vita Wallet — Contractor

 February 2024 – November 2024

 [IOS App](#) •  [Landing page](#)

- Built and maintained UI components in React Native.
- Implemented IOS card tokenization.
- Applied UX principles to improve user interaction.
- Migration of RN 0.66 to RN 0.76 , node 14 to node 22

Viajauto — Freelance Fullstack Developer

 February 2023 – April 2023

 [Android App](#) •  [Landing page](#)

- Built and maintained UI components in React Native.
- Implemented geolocation and Google Maps API.
- Developed geo-sorted trip listings.
- Applied UX principles to improve user interaction.
- Managed sprints and task definition in Jira.

UrbantechCBA — Freelance Fullstack Developer

 January 2023

 [Website](#)

- Developed the frontend using Next.js and TypeScript.
- Applied clean architecture patterns.
- Purchased and configured the domain; deployed the project.
- Designed and implemented a budget calculator and responsive UI.

Ecowe — *Freelance Fullstack Developer*

 **February 2022 – December 2022**

 [Website](#)

- Built UI in React Native; backend implemented with Firebase.
 - Integrated Google and Apple ID for third-party authentication.
 - Used geolocation and Google Maps API.
 - Implemented a QR code generator/reader for service verification.
 - Built a time-trading system between users.
 - Implemented cloud storage file uploads and access.
 - Organized sprints and features in Jira.
-
